Driver's license
Nationality: French (Eligible for J-1 Trainee Visa)

Profile: Software Engineer (MSc in AI & Robotics) seeking an 18-month V.I.E. offering a strong mix of technical problem-solving and client-facing responsibilities. Proficient in scripting (JavaScript, Python) and enterprise software environments. Eager to bridge the gap between complex business requirements and high-quality software implementation.

SKILLS

Web & Backend	TypeScript, Python, Next.js, React, Node.js, REST APIs, C#, .NET
Cloud & DevOps	Vercel, CI/CD (GitHub Actions), Docker, Azure, Self-Hosted Infra
Tools & DB	Client-Facing, Software Implementation, Agile, Git, Visual Studio, SQL, NoSQL, UI/UX focus, Problem-Solving

SELECTED PERSONAL PROJECTS

HabiTalk (habitalk.fr)	⇒ Designed and deployed full-stack web platforms from scratch using TypeScript, Python, and REST APIs.
CrousTillant (croustillant.menu)	⇒ Automated deployment workflows and managed data pipelines.

EDUCATION

2023-2026	CPE Lyon, Integrated work and study program, MSc level ⇒ Majors: AI and Autonomous Robotics ⇒ Options: Information Systems Architecture, DevOps CI/CD, Code Security, Motorized Embedded Systems, Sensors and Probabilistic Robotics, Advanced Algorithms, Transportation Systems and Autonomy, Data
2021-2023	Two-year university diploma in computer science at University Savoie Mont Blanc

WORK EXPERIENCE

From Sept 2024 To present	Software Engineer (since Sept 2026), Software Developer Intern (Sept 2024 – Sept 2026), Sopra Steria – Lyon, FRANCE ⇒ Analyzed business workflows and system requirements to engineer the migration of an on-premises application to the Azure cloud. ⇒ Designed, configured, and tested RESTful APIs and backend services, ensuring seamless data integration and alignment with client specifications. ⇒ Collaborated across functional teams in an Agile setting to perform software testing, deployment, and ongoing system support.
From June 2025 To Sept 2025	Engineer Intern , Universidad Militar Nueva Granada – Bogotá, COLOMBIA ⇒ Conducted complex system modeling and kinematic analysis in an international, multicultural engineering team. ⇒ Applied advanced mathematical problem-solving to validate algorithmic models and delivered comprehensive technical reports.
From Sept 2023 To June 2024	Software Developer Intern , Apitech – Lyon, FRANCE ⇒ Interacted directly with business stakeholders to gather requirements, analyze needs, and translate them into tailored software solutions. ⇒ Configured and customized business-critical application modules, significantly reducing processing times and directly improving client satisfaction. ⇒ Authored functional and technical documentation and actively participated in user feedback cycles to drive continuous solution adoption.
